Discharge Instructions

Client: **September 2016 SPCA Pre-Adopt** (SPSEP16)

Patient: **Adora** (33399921SP), 4 Mos. 1 Wks. 5 Days, Female, White/Liver, Pit Bull Mix, 7.18 kilograms

Diagnosis/Case Summary:

Adora has been hospitalized and treated supportively for parvovirus enteritis. She has been doing well and tested negative for parvo yesterday. She was still having a little bit of diarrhea so we submitted a fecal to IDEXX. This is her second day of being treated with fenbendazole.

Medications:
